Listening along is free and needs no app

All you need is your own phone and headphones.

How it works

1. **Turn off mobile data.** This is the most important step. The wifi in the hall has no internet. If mobile data is on, your phone will switch back to it after a few minutes — and the sound stops, usually in the middle of a sentence.
2. **Scan the first QR code.** The camera app is enough. Your phone connects to the wifi.
3. **Scan the second QR code.** This opens the page.
4. **Choose your language** and tap „Listen“.
5. **Put on your headphones.**

The first time takes a while

The very first connection can take **up to a minute** before the page appears. That is normal. Please wait and **do not reconnect** — reconnecting starts the check over and makes it take longer.

"No internet" — that is fine

Your phone may show an exclamation mark or the message „No internet“. That is true: this wifi leads nowhere. It exists only to carry the sound from the hall to your phone. **Please stay connected anyway.**

If you leave mobile data on: „5G“ or „LTE“ may still show at the top. That is correct and not a fault — the translation still comes over the wifi. But after a few minutes the phone switches back to the mobile network on its own, and then the sound stops. That is why the first step above matters.

If the sound stutters

- **Keep the screen on.** Some phones stop playback when the screen turns off.
- **Use headphones.** Through the loudspeaker the microphone at the front picks up the translation and translates it again.
- **Check the side switch on an iPhone.** If it is set to silent, nothing will be heard.

The translation is made by a computer

It is produced during the sermon, automatically, and may contain errors. The spoken word remains authoritative.

Some languages are marked „experimental“. For those, the church terms have not yet been reviewed by a native speaker.

Supporting the project

Would you like to support the project? There is no need — as a pastor I am already carried by your tithe. If you would still like to give something, please donate to the church. Under „Thank you“ on the page you will find a bank QR code; the amount in it is only a suggestion and can be changed in your banking app.

Telling us something

At the bottom of the page there is a „Report“ button. One sentence is enough — is a language missing, is the sound too quiet? The sound desk sees it immediately. You will not get a reply; there is no time for that during the service.
